January 24, 2011

SUBJECT: Classes D, H, and K MIL-PRF-38534 Certification, Hybrid Microcircuits, MIL-PRF-38534, FSC 5962

Mr. Evon Bennett
Teledyne Microelectronic Technologies
12964 Panama Street
Los Angeles, CA 90066-6534

Dear Mr. Bennett:

Your hybrid facility at 12964 Panama Street in Los Angeles, CA was sample audited the week of March 9, 2010 for compliance with MIL-PRF-38534 Classes D, H, and K. An acceptable level of confidence has been established that compliance with these requirements exists. Therefore, Teledyne Microelectronic Technologies Classes D, H, and K certification (certificate enclosed) is continued effective January 24, 2010.

This certification is for the following:

- a. Quality Management Plan: 7700530 Rev. AB.
- b. Conversion of Customer Requirements: 7002011 Rev. R.
- c. Controlled documentation baseline for processing MIL-PRF-38534 devices: 7700530 Rev. AB.

This certification is valid until terminated by written notification from the qualifying activity. The normal period of certification is two years from the date of the audit and, if warranted, may be withdrawn by DLA Land and Maritime-VQ at any time. Your facility may be re-audited on a drop-in basis at any time.

All screening, qualification, conformance, and periodic inspection must be performed at a facility which has a DLA Land and Maritime-VQ letter of Laboratory Suitability for the applicable test method and condition. QML manufacturers shall notify the qualifying activity immediately after learning of a potential issuance of a GIDEP alert, problem advisory or major quality/reliability problem affecting QML products. This includes failure to perform screening or sample testing (including inspection) in accordance with MIL-PRF-38534. Failure to provide notification may be grounds for removal from QML-38534.

If you have any questions, please contact Mr. Barker at (614) 692-0596.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joseph Gemperline', is written over the printed name.
